

Technology-Based Clinical Supervision

Learning Activity Week 5

This week's Learning Activity, finding the right document, relates to findings and researching current documents that maybe currently in place at your practice or agency or examples you find that would fit what you could use in your current practice.

Please bring any documents you or your agency have created and are willing to share regarding the use of technology, particularly in regards technology based clinical supervision. This could include policies, informed consent agreements, practice standards or other types of documents. You can also research and find good examples to share with the group from other agencies or resources that you find.

Be prepared to discuss and provide resources in our next session.
