

Building Recovery Capital through Digital Health Technologies Learning Activity Week 2

Please answer these questions (responses in short paragraphs):

1. Pick one app and one website. See if you can find their privacy policies. If so, review their policies and determine if you would need to help a patient/peer understand these policies. Be prepared to share your experiences during class time (first part of Week 3).
2. A patient/peer is leaving the session/meeting and stops and says- "oh by the way I found this new app should I use it?" What would you say?
3. What information surprised you the most about privacy and security issues? Why?
4. What would put your center or RCO at most risk regarding privacy, security, and ethical issues- Recommending an app from the Apple or Android Store or the center/RCO requiring patients/peers use an app that reports data back to center/RCO? Why?
5. What advice do you think is the most important to give to patients/peers about Apps, Websites, or SNS regarding privacy, security, and ethics?
