

SBIRT Implementation in Medical Settings

SBIRT and Special Populations

Learning Activity Week 2

Please watch the following YouTube videos in the listed order:

PRIMARY CARE:

SBIRT in Primary Care: At-Risk Alcohol Use

<https://www.youtube.com/watch?v=ONPlsxurlJg>

1. Use this video to review use of the AUIDT screening tool in primary care and how someone might utilize the score in a conversation with a patient.

ADOLESCENTS:

Adolescent Brief Intervention: "Jacob"

<https://www.youtube.com/watch?v=GvaOXREccHI>

1. While watching, please consider how your agency has decided to approach adolescent confidentiality issues with SBIRT screening.
2. Write down at least 4 things that you notice that the video may be trying to emphasize about how to conduct SBIRT with an adolescent. Would you use the same language as this interviewer or what would you do differently?

PROFICIENCY CHECKLIST:

Look at the proficiency checklist in the portal. Consider the following questions:

1. How will our agency develop skills of those delivering brief interventions?
2. What will you do to support staff in learning and practicing these?
3. How could you use a tool like this in your agency?

Please be prepared to discuss these videos and your reflections at our next meeting time.
