

## SBIRT Implementation in Medial Settings

### Analyzing your SBIRT Workflow

### Learning Activity Week 4

Watch Video-SBIRT Workflow

<https://www.youtube.com/watch?v=ogZX6YiHJzg>

Questions to Consider

1. Reflect on your current workflow or what it might look like in the future if you have not implemented yet.
2. What are the barriers that are coming up?
3. What has worked well in the process?
4. What area needs some work or attention?

Draft a Diagram of the Workflow

- From the patient's perspective, diagram what the workflow actually looks like. Where do they enter? Who do they talk to? Who does the screen? Who evaluates the screen? Who does the interventions? Then what happens?
- This can be done using a sketch of a diagram on paper, sticky notes on an agency map, or drafted digitally as examples. Identify points where there are transitions or points that may be potential for congestion.
- Who needs to be involved? Talk with others in your agency about what this could look like from their perspective. How can you engage others at your agency in developing these services?

**Be prepared to discuss and share your diagram at the Week 5 Zoom Session!**
